PYTHON - 6 WEEKS

Youth Civic Bridge

Data Analysis with Python

Already know basic Python? Learn to answer real questions with data using pandas and matplotlib, and finish with an evidence-based report of your own.

What You'll Do

- Clean and explore real datasets
- Build fair comparisons
- Make charts that state a finding
- Write a data-driven report

Scan to sign up

How It Works

Weeks 1-2 **From code to data.** Load, inspect, and clean a real dataset.

Weeks 3-4 **Summarize & visualize.** Compare groups fairly and chart what you find.

Weeks 5-6 **Build your case.** Turn analysis into an argument and present your capstone report.
